

350.560 Lands and water eligible for reclamation or drainage abatement expenditures.

- (1) Lands and water eligible for reclamation or drainage abatement expenditures under the Abandoned Mine Lands Program are those which were mined for coal or which were affected by coal mining, wastebanks, coal processing, or other coal mining processes, and were abandoned or left in an inadequate reclamation status prior to August 3, 1977, and for which there is no continuing reclamation responsibility under the provisions of this chapter. Surface coal mining operations on lands eligible for remining shall not affect the eligibility of those lands for reclamation and restoration under this chapter after the release of the bond or deposit for a remining operation as provided under KRS 350.093. In the event the bond or deposit for a surface coal mining operation on lands eligible for remining is forfeited, funds available under this chapter may be used if the amount of the bond or deposit is not sufficient to provide for adequate reclamation or abatement, except that if conditions warrant the cabinet shall immediately exercise its authority under KRS 350.585.
- (2) If the cabinet determines that the reclamation priority, under the priorities of KRS 350.555(1) and (2), of a site is the same or more urgent than the priority of sites under subsection (1) of this section, the following sites shall also be eligible for reclamation or drainage abatement expenditures:
 - (a) Unreclaimed sites which were mined for coal or which were affected by coal mining, waste banks, coal processing, or other mining processes and left in an inadequate reclamation status during the period beginning August 4, 1977, and ending May 18, 1982, for which the bond, or other form of financial guarantee, was insufficient to provide adequate reclamation or abatement of the site; or
 - (b) Unreclaimed sites which were mined for coal or which were affected by coal mining, waste banks, coal processing, or other coal mining processes and left in an inadequate reclamation status during the period beginning on August 4, 1977, and ending on or before November 5, 1990, where the surety for the permittee became insolvent during the period, and as of November 5, 1990, funds immediately available from proceedings relating to the insolvency, or from other sources have been insufficient to provide for adequate reclamation and abatement at the site.
- (3) Sites under subsection (2) in the immediate vicinity of a residential area or which have an adverse economic impact upon a local community shall be given priority.
- (4) Up to thirty percent (30%) of the funds allocated to the Commonwealth through annual grants from the Secretary of the Interior may be expended for the purposes of protecting, repairing, replacing, constructing, or enhancing facilities relating to water supply, including water distribution facilities and treatment plants, to replace water supplies adversely affected by coal mining practices. If the adverse effect on water supplies referred to in this subsection occurred both prior to and after August 3, 1977, subsections (1) and (2), above, shall not be construed to prohibit use of

funds for the purposes of this subsection, if the adverse effects occurred predominantly prior to August 3, 1977.

- (5) Where the Governor has made a certification under KRS 350.553 and the Secretary of the Interior has concurred in the certification, the reclamation categories of KRS 350.553(2) shall take effect, supplanting the categories of subsections (1), (2), and (4) above.

Effective: July 15, 1994

History: Amended 1994 Ky. Acts ch. 172, sec. 4, effective July 15, 1994. – Amended 1992 Ky. Acts ch. 207, sec. 2, effective July 14, 1992. -- Created 1980 Ky. Acts ch. 62, sec. 20.
